Notes:

- Plenary sessions will take place in in the Green Room.
- 35 minutes are devoted to each paper in a research session. We aim for short initial presentations. This means a 15-minutes presentation, discussion openers should use 3 minutes to open the discussion (no slides), and the remaining time is for Q&A. Chairs should be strict on time keeping.
- All conference papers can be downloaded at <https://events.gwdg.de/event/1071/>. You can access the papers by logging in with the same email they used to register. These papers are for internal use only. Please do not share them with anyone outside of the workshop group.
- Please send us your presentation slides on the day before your presentation to lisa-marie.kotthoff@uni-goettingen.de.
- During the event, we take photos and videos for our public relations work online and in print media, including social media channels, and in individual cases pass them on to third parties for reporting purposes. If you do not wish to be photographed, please inform one of our local staff or send an email to lisa-marie.kotthoff@uni-goettingen.de.
- On Thursday the local buses in Göttingen will be on strike. Fortunately, most accommodations are within walking distance of the observatory, but if you have transportation concerns, please feel free to contact us.
- For transportation between Frankfurt Airport and Göttingen: The most convenient option is taking a direct ICE train from Frankfurt Airport to Göttingen (journey time approximately 2 hours). Alternatively, you can take a train to Frankfurt main station (Frankfurt Hbf) first and then change to an ICE to Göttingen - these connections offer more departure times. The easiest way to book train tickets is through the Deutsche Bahn website (<https://int.bahn.de/en>) or their DB Navigator app (available for iOS and Android). It is recommended to book a flexible ticket in case your flight is delayed.
- Hike on Friday: The hike will be about 1.5 hours long and will go through a park and forest so we recommend appropriate sturdy shoes and an umbrella or raincoat in case of rain.

*This workshop is part of a workshop series on workshop series on Data Science and Global Development. We are grateful for financial support by the **VolkswagenStiftung** in the framework of the Momentum project "Tapping innovative data sources to analyze the impact of authoritarian states on global development."*
